

Stanley Access Technologies

ECO Pro - Electronic Control Option

- New User Interface tool designed for use with all SAT automatic sliding door systems*
- Electronic alternative to manual switches
- Wall-mountable or jamb-mountable right at the door
- Digital display is easy-to-read; push buttons are easy to control

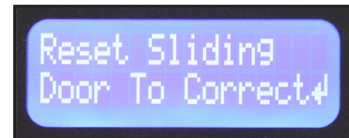

Home Screen indicates current operating mode of the door

Create schedules for enhanced operating mode functions

Works with MC-521 Pro controller and safety sensors to alert of door issues

Recommends simple instructions for on-site correction

Lists contact information when prompted or as necessary

Displays door information including: diagnostics, door identification and cycle count

ECO Pro – Dynamic user interface and diagnostic tool...right at the door

- Compact footprint (4.725" high x 1.811" wide) blends nicely with the door system
- All basic functions of rotary and toggle switches, up to six positions
- Store programmed schedules for enhanced operating mode changes based on the day of the week, time of day, etc.
- Provides easy-to-follow instructions to remedy common door issues

* Requires installation of MC-521 Pro Controller

Stanley Access Technologies - safe, cost effective, and durable solutions customized for every application.
