

SAFER POSITIVE LATCHING FOR ICU/CCU DOORS

The ProCare positive latch features a durable, steel self-engaging hook to secure the door in the closed position; meeting the requirements for positive latching door hardware on ICU/CCU sliding doors.

STANLEY EXCLUSIVES

Eliminate dangerous snagging of IV lines and equipment

- Our contoured handle is completely catch-less
- The positive latch hook is concealed by a retractable shield

Reduce the spread of infection

- The smooth design of the ProCare positive latch has fewer edges to minimize the collection of germs
- Easy to clean

FINISHES:	Silver, Black, or Anti-Microbial (Touch Points)
HARDWARE:	Catch-less handle Positive latch hook with shield
TESTING	Tested to 1 million cycles to ensure long-term, reliable operation Tested to withstand harsh cleaning chemicals Impact testing to ensure engagement of the positive latch hook Impact testing on door handle to ensure durability
LISTINGS:	UL1784 as part of a leakage-rated door system
RATINGS:	Leakage (Smoke & Draft)
CODES AND STANDARDS:	NFPA 105, UL1784
